

\$GTA6

SOLANA · SPL

WHITEPAPER · OCTOBER 2026

VICE CITY RETURNS. *GET IN EARLY.*

Fixed-supply community memecoin for the Grand Theft Auto VI cycle. Built on Solana for holders who want the culture, the liquidity, and a treasury they can actually check.

100,000,000 supply

\$0.05 seed

6 decimals

01 OVERVIEW

Grand Theft Auto VI lands in Leonida on 19 November 2026. The wait is already a culture: trailers, Vice City neon, radio, merch, and a fan base that shows up every time Rockstar posts. \$GTA6 is the on-chain seat for that cycle.

The token is an SPL asset on Solana. Supply is capped at one hundred million. There is no open mint. Seed buyers pay a fixed dollar price, and the allocation, vesting, and burn rules in this paper are the rules the project ships with.

Mission — Community memecoin for Grand Theft Auto VI. Ride the Vice City comeback with a fixed supply, on Solana, for the people waiting on Leonida.

02 WHY THIS CYCLE

ONLY IN LEONIDA

Attention around a Rockstar launch is not a one-week event. Trailer drops, pre-order windows, radio, and launch week each pull a fresh crowd. Most meme coins show up late, with muddy supply and no treasury story.

Vision — be the loudest fan coin through the wait, the trailers, and the launch, with a clear treasury, real liquidity, and a culture that feels like Vice City rather than a generic dashboard.

\$GTA6 times campaigns to that calendar: holder tiers when news hits, rewards funded by a published community allocation, and liquidity reserved before the crowd arrives.

03 THE TOKEN

\$GTA6 is the unit holders use for tiers, campaign boosts, votes, and rewards. It is not a share of Rockstar, Take-Two, or the game. It is the project’s own Solana token, with the parameters below locked as the public spec.

PARAMETER	SPECIFICATION
Name / ticker	GTA6 Coin / \$GTA6
Network	Solana, SPL token program
Decimals	6
Maximum supply	100,000,000 — no unrestricted mint
Seed price	0.05 USD per token
Seed size	5,000,000 \$GTA6 (5%)
Wallets	Phantom or Solflare for the allocation address

04 ALLOCATION & VESTING

Every token is assigned before trading. Percentages below sum to 100. Team tokens do not move in the first twelve months.

POOL	%	TOKENS	RELEASE
Liquidity & exchange reserve 	30%	30,000,000	Seeds DEX depth and listing reserves so the book can take volume.
Community & holder rewards 	25%	25,000,000	Campaigns, referrals, quests, and holder rewards across the hype cycle.
Contracts & platform 	15%	15,000,000	Contracts, dashboards, audits, and chain maintenance.
Marketing & influencers 	15%	15,000,000	KOLs and trailer-reaction pushes timed to news and launch windows.

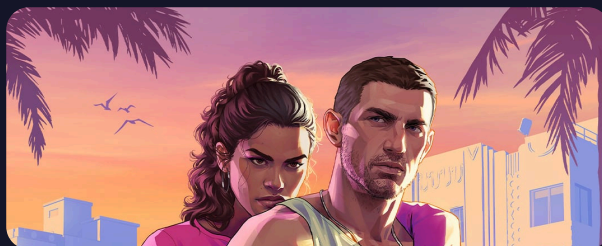

POOL	%	TOKENS	RELEASE
Team & core 	10%	10,000,000	12-month cliff, then 24 months linear. Nothing from this pool in year one.
Seed / presale 	5%	5,000,000	20% at TGE, 80% linear over 12 months.

05 WHAT HOLDERS USE IT FOR

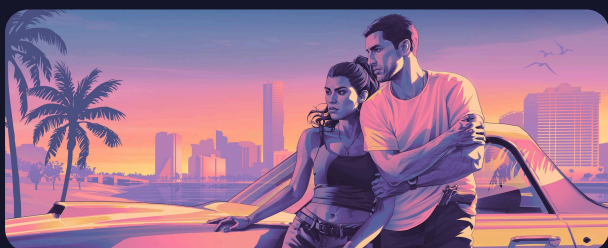

HOLDER TIERS

Bag size opens gated channels, early drops, and first access when GTA VI news hits.

HYPE CAMPAIGNS

Hold or stake to raise reward multipliers on trailer, leak, and launch-date campaigns.

REWARDS & AIRDROPS

Participation, referrals, and quests pay \$GTA6 from the community allocation.

COMMUNITY VOTES

Eligible holders vote on campaigns and spends. Day-to-day treasury stays on multisig.

06 SEED ROUND

The seed is a fixed-price round, not a bonding curve. One \$GTA6 costs 0.05 USD. A buyer chooses an amount between 100 and 200,000 tokens. The server prices the invoice. The browser cannot change that price.

Checkout runs through NOWPayments. SOL is the default asset. USDC, USDT, ETH, BTC, and other listed coins are accepted. The connected Solana address is the allocation address — Phantom or Solflare.

Worked example: 1,000 \$GTA6 is a 50 USD invoice. Twenty percent of the seed unlocks at TGE. The remaining eighty percent vests linearly across the following twelve months.

U L T I M A T E E D I T I O N

SEED PRICE LOCKED AT \$0.05

07 BUYBACK & BURN

Once the treasury is earning, a defined slice — initially targeted at 10% of measured treasury and campaign revenue — buys \$GTA6 on the open market each quarter and sends it to a published burn address. Reports go out with the transaction ids.

01 · REVENUE

Treasury and campaign revenue is measured on a quarterly clock.

02 · BUYBACK

The published portion buys \$GTA6 in the market. The target starts at 10%.

03 · BURN

Purchased tokens move to a verifiable burn address. Supply only goes down.

08 TREASURY & SECURITY

MULTISIG

Treasury moves need multiple signatures. One key cannot drain reserves or fire an emergency function alone.

ON-CHAIN VESTING

Team, marketing, and seed releases sit in public vesting accounts. The team cliff is twelve months, then twenty-four months linear.

PUBLIC WALLETS

Mint, vesting accounts, treasury wallets, and the burn address are published so anyone can recompute the numbers.

HARD CAP

Mint authority does not allow a supply above 100,000,000. There is no hidden emissions switch.

CONTROLS STAY ON-CHAIN AND IN PUBLIC

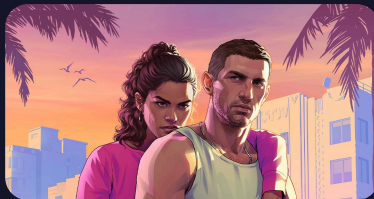

09 ROADMAP

PHASE 1 · Q3–Q4 2026

LEONIDA LAUNCH

- SPL mint live on Solana
- Vesting for team, treasury, marketing, and seed
- Fixed-price presale
- X, Telegram, and Discord
- DEX liquidity with locked LP
- Treasury multisig and separated wallets
- Public supply, vesting, and burn dashboard
- First Vice City campaigns

PHASE 2 · Q1–Q2 2027

TRAILER SEASON

- Holder tiers and gated drops
- Rewards timed to GTA VI news
- Referral rules published
- KOL and meme-page partners
- Votes for eligible holders
- Merch and collectible tests
- Wider social presence
- Published burn reports

PHASE 3 · Q3–Q4 2027

LAUNCH WINDOW

- Mobile holder dashboard
- Staking tests for campaign boosts
- CEX push after liquidity matures
- Cross-chain only after Solana is stable
- Regional chapters
- Culture partners for launch week
- Ongoing quarterly buybacks

10 HOW TO TAKE PART

Open the site, connect Phantom or Solflare, and pick a seed amount. Pay the invoice in SOL or another listed asset. The allocation is recorded to that Solana address. After TGE, the unlocked slice and the vesting account are both visible from the public dashboard.

Liquidity is aimed at a Solana DEX with the LP lock published. Do not buy from a mint or pool address that is not on the dashboard. If the numbers on-chain disagree with this paper, the chain wins — and that disagreement should be treated as a stop sign.

11 RISKS & NOTICES

MARKET

Memecoin prices move hard in both directions. A trailer can lift volume and a quiet month can erase it. Nothing in this paper is a price target or a promise of profit.

EXECUTION

Listings, audits, and partner campaigns depend on liquidity, vendors, and timing. A phase on the roadmap is a plan, not a guarantee that every line ships on the first date.

SMART CONTRACTS

Solana programs can fail or be attacked. Read the published addresses. Do not treat a look-alike ticker or a random pool as this mint.

REGULATION

Rules for tokens differ by country and can change. Buyers are responsible for their own local law. This paper is not legal, tax, or investment advice, and it is not an offer of securities. \$GTA6 is not issued by Rockstar Games or Take-Two and grants no right in the game. Confirm the mint on Solana before sending funds.
